

ToDoRegister

Creation Review

November 10, 2008

Overview

- There is no way to access Google Calendar events from Eclipse IDE
- No functionality for arrange the Tasks with SMS as reminder option and remote data storing

Scope

- Create a new view with a editable list of Tasks
- Each Task is an Event in Google Calendar and has Title, Description, Due-time and Reminder time for SMS recall

Participants & Community

- Initial committers
 - Katja Koltsova: project lead/commmitter
 - Christoph Bockisch: project manager
- Interested parties
 - SE Fachgebiet, Informatik
Fachbereich, TU Darmstadt

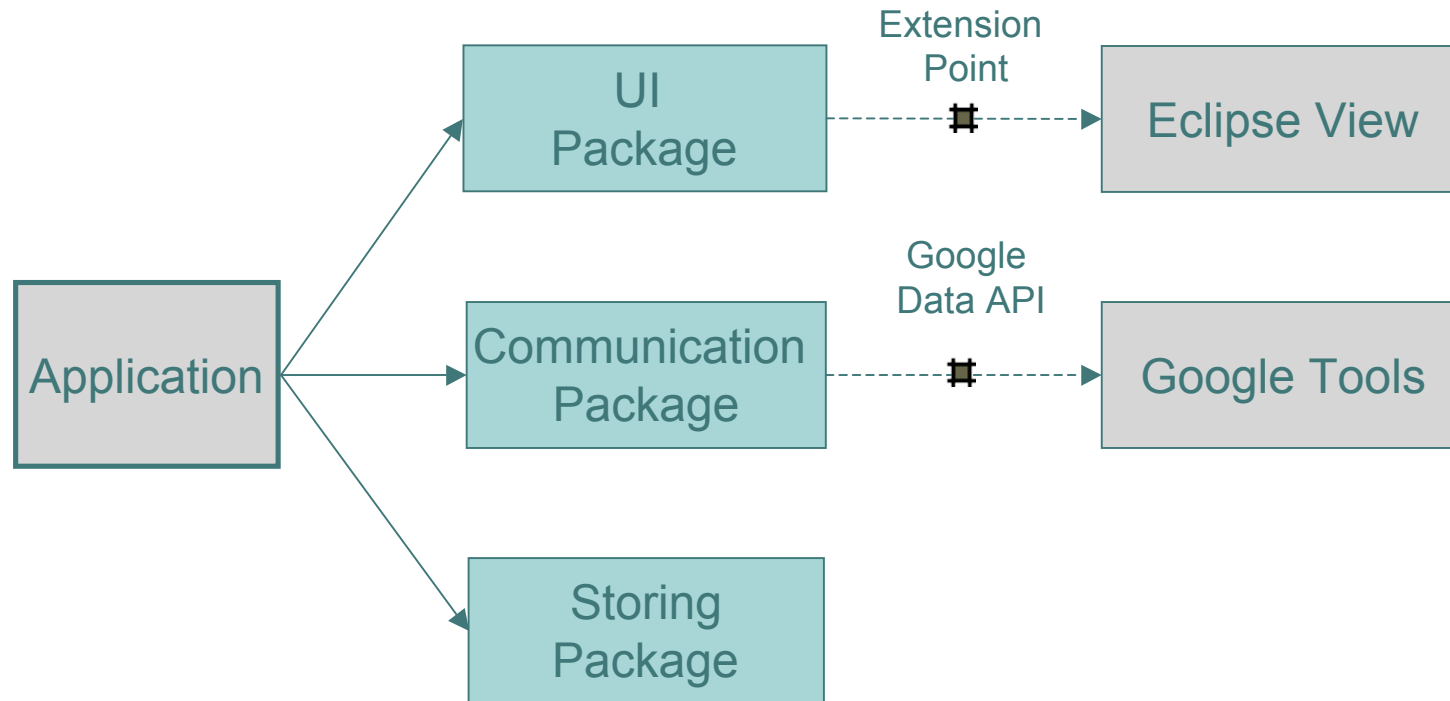

Implementation

- The main application makes use of three packages:
 - UI Package
 - Communication Package
 - Storing Package

Architecture
